

## **Product Information – Lady Charge/Discharge Adapter for LR1, Size N, Lady Battery**

### **Charging Adapter for Lady, LR1, Size N**

The ideal charging adapter for your Lady size NiCd/NiMH batteries.

Maximum charging current: 200mA – higher current may cause battery leakage.

Suitable for batteries with and without button top (e.g., Lady Flat Top).

High-quality aluminum construction, extremely easy to use.

Charging adapter for 1x Lady / LR1 / Size N NiMH/NiCd battery.

Also suitable for charging NiCd/NiMH batteries of the following sizes:

GP 50NH, GP 40AAAM, Panasonic Pro+ P18N, 2/3AAA, Sanyo N-190N.

The ideal solution for charging your Lady batteries. Simply insert the Lady size NiCd/NiMH battery into the adapter and it will be enlarged to the size of a standard Mignon/AA cell. Many standard NiCd/NiMH AA/Mignon chargers can then be used for charging. Delivery includes detailed operating instructions.

You can also discharge NiCd batteries using this adapter if your charger has a discharge function. Please also read your charger's operating manual to ensure it is suitable for this cell size.

### **Technical Specifications**

System: Charging adapter for NiMH/NiCd battery

Maximum charging current: 200mA (please check the charging current of your charger)

External dimensions: approx. 50.15 x 14.02 mm

Inner diameter: approx. 11.9 mm

Weight: 8 grams

### **Technical Data – Lady Charge/Discharge Adapter for LR1, Size N, Lady Battery**

Product type: Adapter, Battery, Battery accessory

Voltage (V): 1.2

Capacity (mAh): Variable

Capacity (Wh): Variable

Diameter (mm): 12

Length (mm): 29

Positive terminal: Flat (Flat Top)

Designations / Model types: 522, AM5, E90, GP910A, Lady LR1 Size N, Lady Size N, LR1

Compatible manufacturer / brand: Universal

Dangerous goods classification: This product is not subject to dangerous goods regulations.
